Work Experience

Avito, Trust & Safety in Fintech, Data Analyst *January 2026 – Present*

- Reduced the share of fraudulent GMV in credit transactions **by 5**× through new antifraud rules, automated monitoring, and improved fraud-signal exchange with lending partners;
- Identified fraudulent users linked to **$500K+ in fraudulent GMV** through regex-based listing detection and analysis of buyer–seller relationships;
- Built a Python-based fraud detection model using logistic regression, achieving **40–50% recall at less than 1% FPR** and detecting two major fraud waves;
- Introduced an AI-assisted fraud assessment framework using random sampling to estimate the share of potentially fraudulent users among those rejected by antifraud rules.

inDrive, Trust & Safety, Product Analyst *September 2024 – October 2025*

- Analyzed relationships between high-risk accounts using graph analysis, enabling automated bans and reducing repeat safety incidents by **~15%** in Latin America;
- Developed a 5-feature in-trip monitoring model to detect ride deviations, increasing monthly incident reports by **3k (~5%)** through proactive detection and passenger alerts;
- Conducted A/B experiments monthly and built a Python library for statistical testing (*pypi.org/expab*), reducing experiment workflow time by **~20%**.

InvestEngine, Product Analyst *March 2024 – August 2024*

- Built the analytics infrastructure from scratch, including data pipelines, a product metrics framework, documentation, and initial dashboards.

Tinkoff, SME, Product Analyst *March 2023 – March 2024*

- Analyzed and A/B tested a new sole proprietorship onboarding process, increasing account utilization conversion by **~11%** and generating over **$10K** in revenue;
- Identified the cause of increased churn rate for debit (business) cards and assisted in developing marketing campaigns that reduced this metric by **~3%**;

Ozon, Express delivery, Data Analyst *August 2021 – March 2023*

- Built advertising performance reports to optimize bids and search keywords, increasing ROMI by **~10%**;
- Developed an investment return forecasting model using historical sales data segmented by paid and organic traffic, helping attract **$25K+** in investments.

Education

Central University, Mathematics & Computer Science, MSc *2025 – Present*

Data Analytics *(Statistics, Data Engineering, Causal Inference)*.

Higher School of Economics, Faculty of Computer Science, Continuing Education *2023 – 2024*

Math for Data Science *(Calculus, Probability Theory, Linear Algebra)*.

Financial University, Faculty of Technology and Data Analysis, BSc *2021 – Present*

Information Technology and Data Science in Economics *(Algorithms, Cryptography, ML)*.

Skills

Python *(Pandas, NumPy, Scikit-learn, SciPy, NetworkX)*; Machine Learning *(Regression, Classification, Gradient Boosting)*; Statistics *(A/B Testing, Hypothesis Testing)*; SQL *(PostgreSQL, ClickHouse, BigQuery)*; Tools *(Airflow, Git, Tableau, Superset)*.
